Date of Birth: 7th June 2000   **Address:** 45 Liffey Crescent, Lucan, Dublin

SUMMARY

Motivated young student with high management skills looking for an internship opportunity at Tallaght University Hospital. Hard working and problem-solving mindset computing student willing to put every skill gained to the test and help your organization. Also interested in picking up new skills, improving personal strengths and gain valuable experience.

GENERAL KEY SKILLS

Self-learning / taking initiative – I can be great at picking up new skills, implementing and able to take initiative to get work done on time.

Teamwork – I have gained valuable skills from team projects from university and back in TY. I developed and picked up additional skills by joining the ISOC society.

Time Management - I consistently get any projects, reports and assignments completed before the given deadline. From planning events, I have made myself more efficient in time management.

Problem-solving – I developed a strong base of problem-solving skills by analysing, detecting, finding alternative solutions and making technical decisions on my projects.

Confidence – I have built up a great amount of confidence in myself by doing group work, presenting in front of a large audience and by working with different types of people.

TECHNICAL SKILLS

Software Design and Development - I am a confident developer using Python and Java. Capable of designing and developing websites using Django, JavaScript, CSS, Bootstrap4, HTML5 and currently studying C++.

Database – Able to write SQL queries Oracle. I'm able to create and edit to the database schemas. I have recently started developed skills using Enterprise Manager and related SQL commands.

Data Analysis – Can use tool such as Excel, word and python to display statistics and other types of data.

Networking and Cloud – Used packet tracer to build different kinds of topology, able to work with Wireshark.
